Waterslide Decals

What you need to know: Our professional waterslide decals are used by luthiers and guitar factories around the world. Ultra-thin decal paper, made in regular batches to our specification so it's always fresh, ensures that the edges vanish easily with minimal lacquering. Opaque inks, totally clear decal film, metallic silver and gold and super fine, crisp print give an exceptional finish.

Your Design

If you have your own design - whether a company logo or special design for a one-off project - we can produce A4 sheets of decals from your own artwork. Bespoke decals are priced per while A4 sheet, and depend on the colour(s) required (black, white, gold and/or silver).

For custom design decals we require artwork in the following format:

- Photoshop (.PSD) file
- 277 x 190mm (A4 less 10mm border)
- 600dpi resolution
- All text must be rasterised
- Artwork should contain only black, white, gold or silver
- Each colour on a separate labelled layer
- Transparent background
- CMYK colour mode
- Solid colours only - no greyscale or fades - in black, white, gold and/or silver.

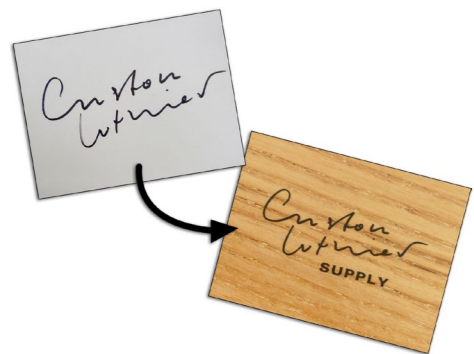

A photoshop template is available to download from: www.rkfst.co.uk/content/pdf/gp0913_template.zip

Custom Artwork / Redrawing / Digital Conversion

Our in-house designers can help with:

- Converting hand drawn logos or photographs to printable digital format
- Modifying existing logos and designs
- Compiling sheets for printing

Custom Signature Decals

Working from a photograph or scan we can redraw pictures of signatures and convert them to waterslide decals for use on your or your customer's signature guitar.

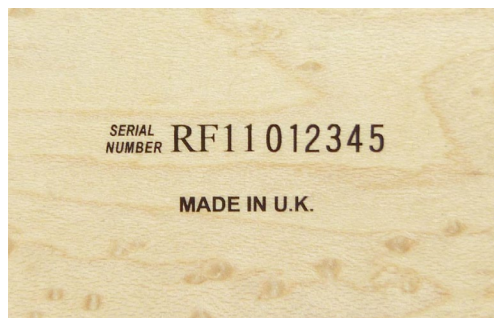

Image required in black and white, JPG, and a "nickname" to go underneath can be specified. Specify dimensions required.

Available in black, white, silver or gold.

Serial Number Decals

For tracing and confirming authenticity of your instruments, we can produce serial number decals in your choice of fonts and layout, numbered sequentially.

Supplied as whole pages.

Custom Name Badges and Plates

Acrylic

Custom nameplate badge for your guitar, amp, case, or anything else you fancy putting it on! These badges are available in clear acrylic with your choice of custom text in one of the many fonts we have available, and with either gold, silver or white background. We make each badge to order customised to your specification. Chrome screws are included with each plate.

Aluminium, Brass or Bronze

Choose your font and let us know the text you would like. Available with 3mm holes or none at all, and in the same sizes as our Acrylic plates. Black screws are included with all metals types.

Your own artwork on any badge

If you would like to see your own artwork on a badge we need artwork in the same specification as for custom decals. Artwork can be printed in black, white, gold and/or silver.

Custom Cut Inlays

High precision cut inlays in a wide selection of materials including mother of pearl, abalone, celluloids, wood and our proprietary glow blanks. Whether you need 10 or 10000, each logo will be identical in fit and design, machined to high tolerances using the precision milling process we have developed for these specialist materials.

Artwork should be provided as a high resolution black and white image; confirm dimensions.

Ready Inlaid Headstock Veneers

As well as cutting the inlay logo itself, we can also cut pockets in headstock veneers and supply as a ready-inlaid item. Giving a precise fit with minimal filling required, these veneers give a highly professional look and save you time.

As well as the pocket we can also cut outlines and tuner holes. Ebony and Rosewood can be supplied, or supply your own veneers minimum 190 x 90 x 2mm.

Heel Plates

Our inlaid heel plates give the final personalised finishing detail on high-end acoustics. Inlaid with your company mark or a customer's initials, these are supplied square for trimming down to the shape required for each instrument.

Available in ebony or rosewood, or supply your own material min 2mm thick.
